Software Engineer — Backend Engineer — Java — Spring Boot — Microservices — ElasticSearch(ELK) — Kubernetes — Kafka
— SQL — AWS — 2+ years experience

Skills

Languages: Java, Python, SQL

Backend: Spring Boot, J2EE, REST, GraphQL, Kafka, low-level design, High-level design, Data Structure and Algorithms

Databases & Cloud: H2, MySQL, ElasticSearch (ELK), NoSQL, PostgreSQL, Oracle db, AWS, GCP

DevOps & CI/CD: Docker Compose, Kubernetes, GitHub Actions, Jenkins

Soft Skills: Communication, Attention to Detail, Problem-Solving, Collaboration

Work Experience

Backend Developer (Java + Spring Boot) – @ SOUL Limited

Bhubaneswar, Dec'23–Dec'24

Hospital Identity Management System (HIMS) (Backend) :

- Developed and maintained backend functionality using **Java** and **Spring Boot**, reducing API response time by 40 %.
- Designed and implemented *RESTful APIs*, applying **J2EE design patterns** (DTO, DAO, Singleton) improving system scalability by 30%.
- Utilized **Spring Boot**, **JPA**, and **transaction management** for efficient data handling.
- Integrated **Swagger** for API documentation and employed **Git & SVN** for version control, improving developer productivity by 15%.
- Debugged and resolved **350+ backend issues**, enhancing system reliability by 20%.
- Mentored two peers on Spring Boot and CI/CD best practices.

Electronic Medical Record (EMR) (DevOps) :

- Handled **DevOps tasks** for the EMR system, including **containerizing services** using **Docker**.
- Set up the **ELK stack for search functionality** and **configured Logstash pipelines** for log processing.
- Deployed **ELK-Kafka servers** using **Docker Compose** with **SSL certificates**. Integrated **Metricbeat** and **Filebeat** for centralized logging.

Graduate Engineer Trainee Intern @ Johnson Controls

Pune, Jan'23–Oct'23

Underwent rigorous industry-level hands-on training, gaining expertise in Java, advanced Java, JDBC, Spring, Spring Boot, Spring REST, and Agile methodologies.

Intern @ HighRadius Corporation

Bangalore, Jan'22–May'22

Contributed to the creation of a comprehensive full-stack web-based product. Gained profound comprehension of various aspects associated with product development, such as identification and assessment of user requirements and the development of appropriate backend architecture.

Technical Projects

BlueComet- link

March'25-present

Built a **GraphQL API** with **Spring Boot & JWT authentication**, improving data fetching by **50%**. Deployed with **Docker & PostgreSQL**, ensuring scalability and maintainability. Planned features: **Real-time notifications**, **Elasticsearch** for Adv. Search.

Shopping Application- link

Jan'23-Jan'23

Developed Shopping Application using spring and utilizing microservices architecture, implemented kafka

Certifications & Credentials

Java 8 : *durgasoft*

ADVANCED JAVA : *durgasoft*

Docker Container : *udemy*

CKAD : *kodekloud*

AWS Cloud Foundations : *aws academy*

Education

B.Tech — Computer Science and IT @ C.V. Raman Global University

Bhubaneswar, 2019–2023

Achievements & Activities

Ranked Top 5% in Leetcode, Solved **470+** problems in LeetCode & GeeksForGeeks, Completed **100+** Days Coding Challenge, Published **10+** tech blogs - link
